Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (previously presented) A process for executing a downloadable service with specific access rights to at least one profile file in a user's computer, said computer comprising a web browser communication to an internet or intranet via a first communication port and socket, said process comprising:

   arranging a confined run time environment which is assigned a second communication port and socket and provided with restricted access to at least one profile file that is located on the user's computer;

   downloading said service through said second communication port so that it is received by said confined run time environment; and

   executing said service within said confined run time environment whereby said service is given restricted access to said at least one profile file.

2. (original) The process according to claim 1 wherein said confined run time environment is an extended sandbox having restrictive access to said at least one profile file.

3. (previously presented) The process according to claim 2 wherein the service is downloaded under the form of a set of java code containing classes structure packaged within a signed archive file; the service comprising remote Internet data, a list of requested data that are needed to personalise the service, and code to sort remote internet data using request accessible data.

4. – 11. (canceled)

12. (previously presented) The process according to claim 1 wherein said downloadable service is an authentication service cooperating with a master card.

13. - 15 (canceled)

16. (previously presented) A process for executing a downloadable service with specific access rights to at least one profile file in a user's computer, said computer comprising a web browser communication to the internet or intranet via a first communication port and socket, said process comprising:

arranging a confined run time environment in said user's computer, said confined run time environment being assigned a second communication port and socket and provided with restricted access to at least one profile file that is located on the user's computer;

downloading said service through said second communication port so that it is received by said confined run time environment; and

executing said service within said confined run time environment whereby said service is given restricted access to said at least one profile file.
